To whom it may concern:

In the 50 (fifty) years I have been riding snow machines the depth of snow rather the calendar was the deciding factor on riding. If you had enough snow to get stuck you rode, if it was mud and bare dirt you quit.

When you pay half the price of a new truck for a snow machine your not going to ride when you have insufficient snow to ride on.

The UTV's with tracks should not be excluded or restricted because sum times it is the only way for some people to get out and enjoy our GREAT outdoors.

Thank you,  
Dan Shedden
