ATV/UTV:

I do like the idea of loops.

If roads are there now, leave them.

50in is starting to be small and agree with wider trails for the utv's.

Over the snow travel:

Dates of use: I don't disagree to a point but some years you can ride before the dates said or after said dates and there needs to be some kind of amendment to that.

If May 9th they get 4 feet of snow and want to go ride we should be able to go. We have been able to ride into July when the snow is good. Dec. 1-April 30 is not acceptable you cannot predict the weather. If there is enough snow people will ride, if not they don't. If they are dumb enough to go wreck their stuff let them and catch them, it will hurt their pocket book anyways.

I don't agree with closing any areas (red).

Quit taking away and putting the blame on another entity. Like game and fish or a judge in Idaho... The government seems to like passing the buck.

Last but not least...

This is WYOMING, stop listening to someone from another state. We like it the way it is. Seems like all the decisions that are being brought up and made are not people from here. I believe that this is following other states and not for Wyoming.

It also seems this has been going on for years to make this. My question is how many man hours and money of the people have been wasted in doing this also?

Thanks for your time
