Subject: Shoshone Forest Plan

Please consider these points when deciding on travel management plan for Shoshone Forest

Seasonal Closure Issues:

The Proposed plan will effect access to predator hunt all winter, loss of access to trap, to lion hunt, and to spring bear hunt. This takes significant means to be able to manage these predators not only by the public but the administration.

The Spring travel will be concentrated on these open areas. Need to disburse the public throughout the forest.

These closures significantly reduce over the snow use, most of forest is already shut down to over the snow use.

Thank You

Joe Kondelis
