Shoshone National Forest Travel Management – Revised Proposed Action comments

This is crazy that we can not ride are tracked vehicles in these areas any more unless they meet your standards. I have road these areas for mane years and never seen any damage done by a snow machine there is 4 feet of snow in most of this area in the winter. lets do the right thing for are out door people and leave are country open so that are kids can enjoy what we was able do when we where growing up in these areas.
