

To the Shoshone National Forest Travel Management Team,

I would like to comment on Proposal NZ-41. This proposal makes no sense for the following reasons. This road is on a south east facing slope that melts off early in the spring. It is mostly solid rock. It has been in the same condition for 40 years. It is a VERY popular place to spring bear hunt, and a good shoulder season ride. I do not mind a seasonal date on this road, however it needs to be May 1<sup>st</sup>, to accommodate bear season. It also needs to be open to over the snow travel in the winter, to accommodate lion hunting, as this is a popular area adjacent to wildlife winter range, that needs to have the lion population managed.

Thanks,

Dustin Rosencranse
