Subject: Shoshone National Forest sub part C

Good afternoon,

I am writing on behalf of myself and would like to comment on the proposed dates for motorized access during the winter in the Shoshone National Forest, specifically sub part C.

Having used the Shoshone National Forest in the winter for 46 years and knowing snow conditions over that time I feel it is reasonable to allow access to the public during these dates:

Low elevation from 11/15 through 4/30

High elevations from 11/1 through 6/30

This time span would allow access during early snow years and also late snow years. I know there have been many years we have had a special ride on Mother's Day, and have also used the area after Mother's Day. As of this date, 11/22/17, many people have already been out enjoying their motorized use due to the snow already available, so the 11/1 date is completely reasonable.

Please feel free to contact me with any questions.

Thank you

Taylor Jones
