Not sure why but if we have to have a connection (thus a loop from FSR 532 thru FSR732 and back to FSR 532) then I would recommend that the 04B route be selected over the 04A route that is user created and so much closer to Warm Springs Creek. All I see is continued problems of user created routes to the creek. A long with this proposal should be a commitment to establishing an effective closure of the user created route along the 04A route, since this is travel management and not just travel creation.
