Comments on Current Proposals

- 1. Which proposal are you commenting on?**
WR-07, WR-13, WR-18, and by default WR-42

2. Provide comments below on the proposal: (continue on back if needed)

Please be specific and provide rationale for your position. In other words why do you like or dislike about the proposal.

Apparently we are going to concede the battle to keep people from driving up that steep user created route that for the most part parallels the forest boundary and fence line to Warm Springs Mountain. Please place the route where the less amount of damage to soils and vegetation will occur and also devise and articulate an effective plan in this proposal to keep the motorized trail users on just the one authorized route in this wide open area. I do like the idea to reroute the portion of FSR 529 to avoid private property. Not only will these proposals create one additional loop, they will make it possible to have a figure 8 loop from and to the parking area near the start of WR-07. Woopie!

I guess by default I reject the proposal to close FSR 529 (WR-42). Then the only users that would be making regular illegal use of this closed area would be the adjacent private land owners.

Mark Hinschberger
