Comments on Current Proposals

1. Which proposal are you commenting on?

WR-30

2. Provide comments below on the proposal: (continue on back if needed)

Please be specific and provide rationale for your position. In other words why do you like or dislike about the proposal.

I could possibly support this proposal, if there was a way to physically define the end of the existing road on the ground, but not the user created extensions. What will be used to keep motorized users from traveling on the user created portions of this route and beyond in this wide open country? And why would you limit this route to ORVs? Dean Sersland wasn't asking that this route be opened as a motorized trail; he doesn't own an ATV, and the standard for Management Area 3.3C is to prohibit new road construction or existing road reconstruction unless needed to honor existing rights (MA3.3C-STAND-01). My proposal would just use an existing road and I don't propose reconstruction it. If it can't be an open road on an existing road, then I don't support this proposal to make it a motorized trail that will breed more user created routes from it.

Mark Hinschberger
