

Please see maps A, B, C.

Map A - From FS 554 - Reopen FS 554.1H and extend to a connection with 524. The existing road to the old tie hack camp is in good condition and the two track which currently exists would require little preparation to create a nice loop road or shorter access to Moon Lake. Through the proper placement of a few large rocks at the junction of 554 and 554.1H access could be limited to >50" vehicles.

Map B - FS 692 currently ends at an old cut block, in the North West corner of that cut exists a two track which leads to the edge of the wilderness and one of the most spectacular views in the area. Little would be required to open this trail for many to enjoy. There are no wetlands or drainage issues on this route and little long term maintenance would be required. A restricted entrance would be easy to achieve through proper placement of old stumpage.

Map C - The currently existing proposal to connect 529 to 528.D is an excellent decision. Again a low cost modification to the current trail system as both a good road exists part way and a easily controlled two 2 track exists off of 528.2D.

Thank you for your time and consideration.

Respectfully yours,

Jack Gordon
