

Shoshone National Forest Travel Management Proposal Form

Ranger District: Wind River

New Proposals

- 1. What is the proposal?** (loop; additional route; closures; seasonal restrictions; reconstruction; maintenance, etc.)

I suggest that this travel management process now be used to close the cross-country ski areas and their trails to snowmobile use, except for the equipment used for grooming those trails.

- 2. Where is the proposal located?**

My proposal to close the designated x-country ski trails to snowmobiles includes all of the designated ski trails on the District.

- 3. What is the reason for your proposal?** (continue on back)

It is past time to provide a few locations in the front country where cross country skiers and snowshoers can travel and have some solitude from the roar and whine of snowmobile engines.
