

Perpetua Resources' Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. The company has a plan to improve water quality, wetlands and the river and leave the site better than it is today. I am writing to encourage you to permit the project as quickly as possible.

It is time to move the Stibnite Gold Project. Perpetua Resources has spent the last 12 years working with stakeholders to make sure its project meets the highest environmental standards and brings positive benefits to Idaho. Over the past six years, multiple federal, state and local agencies have analyzed the project as part of the review process. The public has had ample time to review Perpetua's plans and two opportunities to provide comments. The input and permitting process has improved the plan. Perpetua resources has increased recreational access, improved water quality and reduced its project footprint. It is time to move the project forward.

I urge you to approve Perpetua Resources' project. The Stibnite Gold Project will provide a huge benefit to our community and the local environment and the company has taken the time to reduce its footprint and improve water quality at site. The permitting process is designed to move the best plans forward and I feel that is what we will do with the 2021 Modified Mine Plan.
