

Public participation is a huge part of the permitting process and I appreciate the opportunity to share my thoughts on the SDEIS. This project is important to me because it can provide America with a domestically mined source of antimony and restore an abandoned mine site in need of repair.

The permitting process has made the Stibnite Gold Project better. Perpetua Resources has listened to input from the public and regulators and found ways to reduce its project footprint, improve fish habitat and eliminate the need for long-term water treatment. Reviewing the Burntlog Road option in the SDEIS, it is clear to me the company plans to mine the area responsibly and minimize its environmental impacts. I hope the USFS will move this improved plan forward.

This Stibnite Gold Project is a huge opportunity for Idaho. Please permit the 2021 Modified Mine Plan and move the project forward so America can reap the positive impacts.
