

I DO NOT support this mine, it is bad for the environment the Salmon ECT. Please don't forget about the negative environment impact that mines have.

A review by the Environmental Protection Agency found that Perpetua's initial plan for a 20-year operation would inflict "disproportionately high and adverse impacts" on tribes, according to a November 2020 letter from the agency, and environmental groups have warned that the mine could damage or destroy huge swaths of fish habitat.

NO !
