

Thank you for the opportunity to comment on the SDEIS for the Stibnite Gold Project. This project is important for Idaho's future and our nation's future. Perpetua Resources I don't feel is the best choice for mining in Idaho. I don't trust Laurel Sayer . I think once the mining is done she will sell the region out and turn it all into wilderness. Her rule when in charge of Midas gated everything in site, including property not belonging to Midas. She is dishonest and I'm nervous about her being in charge of Perpetua.

I would love to see mining and the jobs it would bring to Idaho but the aftermath of Perpetua's extremist leader I feel is not worth the small gain.

Tourism and people exploring Idaho is a permanent thing Perpetua will pillage and be gone in 15 years.

Perpetua Resources also has only brought employees from out of state so far. No one from the area has been put to work. This puts more strain on housing in the area. I don't feel Perpetua is loyal to the people and neighbors and they have proven it several times.
