

Public participation is a huge part of the permitting process and I appreciate the opportunity to share my thoughts on the SDEIS. This project is important to me because it can provide America with a domestically mined source of antimony and restore an abandoned mine site in need of repair.

It is time to move the Stibnite Gold Project. Perpetua Resources has spent the last 12 years working with stakeholders to make sure its project meets the highest environmental standards and brings positive benefits to Idaho. Over the past six years, multiple federal, state and local agencies have analyzed the project as part of the review process. The public has had ample time to review Perpetua's plans and two opportunities to provide comments. The input and permitting process has improved the plan. Perpetua resources has increased recreational access, improved water quality and reduced its project footprint. It is time to move the project forward.

The Stibnite Gold Project is important to Idaho, our national security and clean energy future. Regulators have been reviewing the project for the past 6 years. This time has allowed the project to improve and, now, I encourage you to permit the project as quickly as possible.

Jimmy Waters
