

I am proud to welcome Perpetua Resources into our state and proud to support the Stibnite Gold Project. The project will produce America's only source of antimony, a mineral our national security and clean energy future depends upon, and leave the site in better condition than it is today. I hope you will take the time to consider my comments on why you should move to permit the project.

Perpetua Resources has studied Stibnite for the past 12 years. The company has identified a safe way to mine the site, while minimizing environmental impacts in the Burntlog Route and providing our nation with a source of the critical mineral antimony. Today, there is no mined antimony in the United States and that concerns me. Antimony is crucial to our national security. It is found in every military bullet, uniform and flare. Simply put, we need antimony to keep our troops and country safe. The Stibnite Gold Project would meet 35% of America's antimony demand. This is clearly a project we need to move forward.

Thank you for reviewing my comments. Again, after the USFS has lead a rigorous review process, I urge you to permit Perpetua Resources' carefully thought out plan as outlined under the 2021 Modified Mine Plan.
