

I am proud to submit my comments in support of Perpetua Resources' Stibnite Gold Project. This project presents our state with an incredible opportunity to bring well-paying jobs to rural Idaho, boost our state's economy and provide our nation with the much-needed critical mineral antimony. Today, America relies on China and Russia to provide us with antimony. The Stibnite Gold Project could help us secure a domestic source of antimony.

America's armed forces depend on antimony and, today, we have no domestic supply. This means we are putting our faith in China and Russia to keep our troops safe. This seems incredibly risky given all that is happening in the world. The Stibnite Gold Project, utilizing the Burntlog Route, presents us with an opportunity to secure our national security future and restore an abandoned mine site. We cannot let this chance pass us by.

This project is a huge opportunity for Idaho. After 6 years of intense review, I encourage the U.S. Forest Service to permit the 2021 Modified Mine Plan so this brownfield site can finally be restored.
