

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project. There are many reasons why I am excited for Perpetua's project to come to life. It would provide America with our only mined supply of antimony, a mineral critical to our national defense and energy sectors. I hope through my comments you will understand why I want to see this project move forward.

After reviewing the SDEIS, the 2021 Modified Mine Plan appears to be the alternative that best minimizes adverse environmental impacts as required in the Forest Service's regulations. The company has very comprehensive mitigation measures to protect the natural habitat, wildlife and fish. As a private citizen, I appreciate that in addition to the lengthy NEPA review provided by the U.S. Forest Service the Stibnite Gold Project will also be required to comply with all applicable federal and state laws and regulations, including those governing financial assurance. This knowledge makes me feel comfortable supporting the 2021 Modified Mine Plan and encouraging you to move it forward. Perpetua Resources has proven they are listening to community feedback. The company has gone back to reduce the footprint, improve water quality, so there is no need for long-term treatment, and ensure water temperatures stay at or below current conditions.

Perpetua Resources wants to invest \$1 billion in our state, bring more than 1,000 jobs to rural Idaho and still provide access to Idaho's public lands. This is the type of project our state needs. After reviewing the project for six years, I highly encourage the U.S. Forest Service to move the project forward with the improvements laid out in the SDEIS.
