

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. Over the past several years Perpetua has shown its commitment to Valley County and the state of Idaho. I encourage you to permit the improvements proposed by the company and move the project forward using the Burntlog Road route.

Perpetua Resources has a clear plan to clean up legacy issues in the historic Stibnite Mining District. The company has recently made improvements to their plans that reduce the project footprint, improve water quality and keep water temperatures at or below current conditions. This will improve fish habitat, water quality and safely store old mine waste. Along with restoring the site, the Stibnite Gold Project will produce the only domestically mined supply of antimony. Currently, China is the top producer of this mineral. If the Stibnite Gold Project moves forward, the United States can become less reliant on other countries. Creating a domestic source of antimony will also be beneficial for America's green future. Sourcing antimony within the U.S. will result in lower carbon emissions as we will not need to transport the mineral from China into the U.S. Mining standards in the U.S. are also more protective of the environment.

For the above reasons and many more, please move forward with the 2021 Modified Mine Plan for the Stibnite Gold Project as it is important to all Idahoans. After more than 12 years of scientific analysis by the company and six years of regulatory review that the project, we should not have to wait much longer to recognize the project's benefits.

Daniel Jimenez
