

Perpetua Resources has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of Idaho. They've volunteered their time in our schools and given generously to community causes. Perpetua Resources' track record of following through on its promises and doing the right thing gives me the confidence to write in support of permitting the Stibnite Gold Project.

After reviewing the SDEIS, the 2021 Modified Mine Plan appears to be the alternative that best minimizes adverse environmental impacts as required in the Forest Service's regulations. The company has very comprehensive mitigation measures to protect the natural habitat, wildlife and fish. As a private citizen, I appreciate that in addition to the lengthy NEPA review provided by the U.S. Forest Service the Stibnite Gold Project will also be required to comply with all applicable federal and state laws and regulations, including those governing financial assurance. This knowledge makes me feel comfortable supporting the 2021 Modified Mine Plan and encouraging you to move it forward. Perpetua Resources has proven they are listening to community feedback. The company has gone back to reduce the footprint, improve water quality, so there is no need for long-term treatment, and ensure water temperatures stay at or below current conditions.

The Stibnite Gold Project has been under federal review for the last six years. That has given regulators and the public plenty of time to review the company's plan. I know this project will transform an area in need of environmental repair and secure a domestic supply of antimony. It is for all of these reasons that I encourage you to move the Stibnite Gold Project forward.
