

Perpetua Resources has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of Idaho. They've volunteered their time in our schools and given generously to community causes. Perpetua Resources' track record of following through on its promises and doing the right thing gives me the confidence to write in support of permitting the Stibnite Gold Project.

America's armed forces depend on antimony and, today, we have no domestic supply. This means we are putting our faith in China and Russia to keep our troops safe. This seems incredibly risky given all that is happening in the world. The Stibnite Gold Project, utilizing the Burntlog Route, presents us with an opportunity to secure our national security future and restore an abandoned mine site. We cannot let this chance pass us by.

Reviewing Perpetua Resources' improved plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. That is why they reduced water temperatures, improved water quality and shrunk the project footprint by 13 percent. I urge you to trust in your own review process and permit the Stibnite Gold Project.
