

Due to the potential of Perpetua Resources' Stibnite Gold Project , even before Perpetua Resources involvement , I believed in the vision of other shareholders to become an Investor. Years ago had some

acquaintance with antimony working in stereotype dept. of NEWSPAPER. Later learned antimony is rarely

found in the U.S. Thankfully it is mined in Idaho along with Gold which also has valuable Historical VALUE as well.

So Perpetua Resources' Stibnite Gold Project has shown Positive Continued Improvement in the Area of Mining which can draw others to positively benefit Idaho.

Hopefully the U.S. FOREST SERVICE AGREES WITH THE PROGRESS MADE SO FAR AND THE FUTURE POTENTIAL AHEAD.

CHARLES REID
