

Perpetua Resources has been a member of our community for the past decade. During this time, the company and its employees have become wonderful champions and supporters of Idaho. They've volunteered their time in our schools and given generously to community causes. Perpetua Resources' track record of following through on its promises and doing the right thing gives me the confidence to write in support of permitting the Stibnite Gold Project.

I have reviewed the 2021 Modified Mine Plan and I believe the Stibnite Gold Project is an opportunity to repair the environment and bring an economic boost to the community. The plans proposed by the company allows the project to finance environmental reclamation and provide the workforce and resources necessary to complete it. If Perpetua Resources isn't allowed to move forward with its plan, this area in Idaho's backcountry will continue to suffer. Currently, salmon are being blocked from their native spawning grounds and hundreds of tons of sediment are pouring into the watershed each year. It is beyond time to address these issues and Perpetua has the right plan to do it. The company made its plans even better after the release of the DEIS. In the 2021 Modified Mine Plan the company reduced the project footprint by 13 percent (compared to the original design), cut back on mined material by 10 percent and eliminated the need for long-term water treatment. In reviewing the document, I think the company is taking the steps needed to protect the area and mine the area safely using the Burntlog Route.

I encourage the USFS to move the Stibnite Gold Project forward and permit Perpetua Resources' project as outlined in the 2021 Modified Mine Plan. At this point, the Stibnite Gold Project has been studied by regulators for the last six year. That is enough. Now, it is time to let Perpetua get to work.
