

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the National Environmental Policy Act. I believe the project can help stop America's import reliance on antimony and address legacy impacts in the historic Stibnite Mining District. I hope my letter will help as you evaluate the recently published SDEIS.

The permitting process has made the Stibnite Gold Project better. Perpetua Resources has listened to input from the public and regulators and found ways to reduce its project footprint, improve fish habitat and eliminate the need for long-term water treatment. Reviewing the Burntlog Road option in the SDEIS, it is clear to me the company plans to mine the area responsibly and minimize its environmental impacts. I hope the USFS will move this improved plan forward.

I encourage the USFS to move the Stibnite Gold Project forward and permit Perpetua Resources' project as outlined in the 2021 Modified Mine Plan. At this point, the Stibnite Gold Project has been studied by regulators for the last six year. That is enough. Now, it is time to let Perpetua get to work.
