

I am writing in support of the Stibnite Gold Project. The project will help restore the site, secure the minerals we need for our national security and strengthen America's supply chains. Thank you for the opportunity to provide my feedback once again.

The permitting process has made the Stibnite Gold Project better. Perpetua Resources has listened to input from the public and regulators and found ways to reduce its project footprint, improve fish habitat and eliminate the need for long-term water treatment. Reviewing the Burnt Log Road option in the most recent SDEIS, it is clear to me the company plans to mine the area responsibly and minimize its environmental impacts. I hope the USFS will move this improved plan forward.

Please move the Stibnite Gold Project forward, especially now that the public has had multiple opportunities to provide feedback and regulators have been analyzing Perpetua Resources' plans for six years. The review process has improved the project and now it is time to make it a reality.

Thanks for the opportunity to comment,

Nancy Sommerwerck
