

I am writing in support of the Stibnite Gold Project and the benefits it will bring to Idaho. This project has the potential to put hundreds of Idahoans to work, bring a \$1 billion investment into our state and restore an area of Idaho's backcountry desperately in need of repair. Today, fish cannot swim past the Yellow Pine pit and heavy metals are leaching into the ground and surface water. The Stibnite Gold Project can leave the conditions better than they are today.

Perpetua Resources has studied Stibnite for the past 12 years. The company has identified a safe way to mine the site, while minimizing environmental impacts in the Burntlog Route and providing our nation with a source of the critical mineral antimony. Today, there is no mined antimony in the United States and that concerns me. Antimony is crucial to our national security. It is found in every military bullet, uniform and flare. Simply put, we need antimony to keep our troops and country safe. The Stibnite Gold Project would meet 35% of America's antimony demand. This is clearly a project we need to move forward.

For the above reasons and many more, please move forward with the 2021 Modified Mine Plan for the Stibnite Gold Project as it is important to all Idahoans. After more than 12 years of scientific analysis by the company and six years of regulatory review that the project, we should not have to wait much longer to recognize the project's benefits.
