

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. Perpetua has shown they are committed to Idaho and want to take care of the environment. The company designed its project to clean up legacy waste, reconnect salmon to their native spawning grounds and fix one of the watershed's largest source of sedimentation. The Stibnite Gold Project would water quality, wetlands and the river better than they are today. I hope you move forward and permit this project as quickly as possible.

It is time to move the Stibnite Gold Project. Perpetua Resources has spent the last 12 years working with stakeholders to make sure its project meets the highest environmental standards and brings positive benefits to Idaho. Over the past six years, multiple federal, state and local agencies have analyzed the project as part of the review process. The public has had ample time to review Perpetua's plans and two opportunities to provide comments. The input and permitting process has improved the plan. Perpetua resources has increased recreational access, improved water quality and reduced its project footprint. It is time to move the project forward.

The Stibnite Gold Project is the type of project our state needs. It has been in regulatory review for the past six years. During this time, public comments and scientific analysis has helped to improve the plan. But now it is time to move it forward. I highly encourage the U.S. Forest Service to permit this project, using the 2021 Modified Mine Plan presented by Perpetua Resources in the SDEIS, as expeditiously as possible.
