

I DO NOT support this project! It will be a detriment to our forest, to our environment, and to our livelihood up here. They make all kinds of promises to bring in lots of high paying jobs, to clean up their mess, and to protect our water table but it's all BS. They are all about their bottom line and nothing else. They come in here and schmooze our commissioners and other elected officials and donate money to our causes trying to ingratiate themselves into our community. It's disgusting! Too many people believe their lies but not all of us do. It's all for show to get what they want out of us and destroy everything around us.
