

I am glad for the opportunity to provide feedback on the Stibnite Gold Project as part of the public permitting process. This project will have a positive impact on the environment, communities surrounding the site and those living in Idaho.

I sincerely ask the U.S. Forest Service to move the Stibnite Gold Project forward. This permitting process is created to advance the best plans possible. I see the work of regulators over the past six years is proof this is what is happening with the Stibnite Gold Project. As the thorough review process has been beneficial, there should not be more delays. The project should move forward at this time.
