

Perpetua Resources' Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. The company has a plan to improve water quality, wetlands and the river and leave the site better than it is today. I am writing to encourage you to permit the project as quickly as possible.

I am supportive of Perpetua Resources' refined plan in large part because regulators named it as their preferred alternative. The USFS indicated it was the best option for mining the site because it eliminated the need for perpetual water treatment, had a better access route and did a better job managing stream temperatures. Regulators would not have identified Perpetua's plan as their favorite unless they were confident the company could minimize impacts to the environment and community while mining for gold and the critical mineral antimony.

The permitting process is working. The plan for the Stibnite Gold Project is improved. Now, it is time to move this project forward to a final record of decision.
