

I am writing to share my thoughts on Perpetua Resources' Stibnite Gold project.

Every time a mining company comes into Idaho, they leave behind a mess for the local people to clean up. They do what they want and they make a mess and then the Forest Service slaps their hands and then they leave. And we still get to clean it up. Don't believe me, check PBS and their mine series shows from Outdoor Idaho. I live in a mining community. We are still suffering from all that clean up. I do not approve this project. Not one bit.
