

Perpetua Resources' Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. The company has a plan to improve water quality, wetlands and the river and leave the site better than it is today. I am writing to encourage you to permit the project as quickly as possible. I disagree with our Political class that promotes relying on foreign countries for our minerals and oil. It is past the time to become more self-reliant. There are people that just oppose everything anymore. You have to look past all the negativity sometimes.

Everyone who cares about Idaho's fish populations should take notice of some of regulators' conclusions in the SDEIS. Importantly, the SDEIS states by providing volitional passage for fish, Perpetua will have a beneficial impact on fish populations within the vicinity of the mine. Right now, the abandoned Yellow Pine Pit currently blocks fish access to the East Fork of the South Fork of the Salmon River. Fish will continue to be blocked from high quality habitat unless we let Perpetua Resources move forward with its plan. We should allow Perpetua Resources to mine at Stibnite, so we can help fish, secure American supply chains and provide family-wage jobs to Idahoans.

This project is a huge opportunity for Idaho. After 6 years of intense review, I encourage the U.S. Forest Service to permit the 2021 Modified Mine Plan so this brownfield site can finally be restored. It is crazy to me that it takes this long to get a project in place. I am amazed that a company would even want to go through all these hoops to get started. Stop the insanity and let's go.
