

Thank you for the opportunity to comment on the SDEIS for the Stibnite Gold Project. This project is important for Idaho's future and our nation's future. Perpetua Resources has a plan to leave the site better than they found it and produce antimony, a mineral we need for our national defense and clean energy future.

I've read the economic impacts section of the SDEIS, which estimates that the full compensation for Stibnite Gold Mine jobs would be \$67700/year and \$96600/year after accounting for health and employee benefits. The document says that this is about the same as the area's prevailing Davis Bacon rates of \$20-30/hour. You don't need to be good at math to see that the Stibnite Gold Mine jobs are going to pay a lot more than a Davis Bacon job – even \$30/hour is less than \$67k/year. Add in \$30000 in annual benefits and these are excellent jobs, the kind much needed for local workers to support local families, especially given inflation.

Please move the Stibnite Gold Project forward, especially now that the public has had multiple opportunities to provide feedback and regulators have been analyzing Perpetua Resources' plans for six years. The review process has improved the project and now it is time to make it a reality.
