

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. The project would finally address legacy mining issues that have been plaguing the site for decades and help secure the minerals we need for America's future. The company has shown its commitment to Valley County and the state of Idaho and I encourage you to adopt the proposed activities outlined in the company's 2021 Modified Mine Plan during the permitting process.

Today, arsenic and antimony levels at the site are far beyond what is considered healthy for humans or aquatic life. Metals have been leaching into the ground and surface water around the site for years from mine waste that was left behind from legacy mining operations. The Stibnite Gold Project, as outlined in the preferred alternative, will improve water quality conditions at the site because Perpetua Resources plans to remove old mining materials. Of course, the project will contribute new mine waste. However, the SDEIS concludes Perpetua's design features and today's technology will reduce new impacts to water quality. There are environmental benefits to the Stibnite Gold Project and I believe the right checks and balances are in place to move the project forward.

For the above reasons and many more, please move forward with the 2021 Modified Mine Plan for the Stibnite Gold Project as it is important to all Idahoans. After more than 12 years of scientific analysis by the company and six years of regulatory review that the project, we should not have to wait much longer to recognize the project's benefits.
