

Thank you for the opportunity to comment on the plans for the Stibnite Gold Project. Over the last several years, I've had the opportunity to hear a handful of presentations on the project, sit down with members of Perpetua Resources and observe how the company has lived out its mission as it has grown. It is with this knowledge that I encourage you to move the project forward.

I agree with regulators and feel strongly that the preferred alternative is the best option for the Stibnite Gold Project moving forward. This option utilizes Burntlog Road. According to the SDEIS, this route would avoid environmental and safety risks associated with the avalanche and landside prone Johnson Creek Road. We need the minerals from Stibnite and Burntlog will allow mining to move forward while minimizing the impacts of mining on the community. Burntlog will reduce mine traffic interactions with the public and decrease the potential for spills near fish-bearing streams.

The Stibnite Gold Project is important to Idaho, our national security and clean energy future. Regulators have been reviewing the project for the past 6 years. This time has allowed the project to improve and, now, I encourage you to permit the project as quickly as possible.
