

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. Perpetua has shown they are committed to Idaho and want to take care of the environment. The company designed its project to clean up legacy waste, reconnect salmon to their native spawning grounds and fix one of the watershed's largest source of sedimentation. The Stibnite Gold Project would water quality, wetlands and the river better than they are today. I hope you move forward and permit this project as quickly as possible.

The EIS document estimates that the project will generate \$29.4 million in taxes annually and create thousands of jobs for Idahoans and nationwide. I reviewed section 21 which summarizes the beneficial economic impacts from the project. The 2,690 jobs created by the mine during operations annually, and almost 5,000 jobs created during construction, would be a huge benefit to the local and state economies. Moreover, these would be high paying jobs offering good benefits and supporting workers families. This is exactly the kind of economic incentive that is needed in rural Idaho. The McCall area can't make it on tourism alone.

I appreciate your time and thoughtfulness in the review process. The U.S. Forest Service has not cut any corners over the past 6 years analyzing the project and I've appreciated the opportunities to provide feedback. For the reasons I stated in my letter above, please permit the Stibnite Gold Project.

Lloyd McCarley
