

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. Over the past several years Perpetua has shown its commitment to Valley County and the state of Idaho. I encourage you to permit the improvements proposed by the company and move the project forward using the Burntlog Road route.

Everyone who cares about Idaho's fish populations should take notice of some of regulators' conclusions in the SDEIS. Importantly, the SDEIS states by providing volitional passage for fish, Perpetua will have a beneficial impact on fish populations within the vicinity of the mine. Right now, the abandoned Yellow Pine Pit currently blocks fish access to the East Fork of the South Fork of the Salmon River. Fish will continue to be blocked from high quality habitat unless we let Perpetua Resources move forward with its plan. We should allow Perpetua Resources to mine at Stibnite, so we can help fish, secure American supply chains and provide family-wage jobs to Idahoans.

Perpetua Resources wants to help America secure a domestic supply of the critical mineral antimony and clean up a brownfield site. They've made great improvements to the project from the original documents they submitted – this shows the permitting process has done its job. It is time to permit the Stibnite Gold Project and continue to move this important project forward.
