

Ms. Jackson, Payette Forest Supervisor  
Stibnite Gold Project  
500 N. Mission Street, Building 2  
McCall, Idaho 83638

Ms. Linda,

America desperately needs antimony. This mineral is used in munitions, large-capacity storage batteries, fire retardants and more. Currently, we are entirely dependent on foreign countries to provide this mineral, which is why I am writing in support of the Stibnite Gold Project. This project can stop our import reliance on antimony.

The Stibnite project is important to me because it will strengthen our national security through the production of antimony. Right now, the U.S. relies on foreign countries for antimony and they do not have the environmental laws and regulations, no labor laws to prevent children from working in mines and most do not follow the same safety measures our County does. These days, I think Americans value a domestic supply chain for such important minerals more than ever. The project at Stibnite could produce over 100 million pounds of antimony and become our only domestically mined source in the entire country. I feel confident in the company's 2021 Modified Mine Plan.

Perpetua Resources is the type of company we want in our communities. They are open and transparent and have spent many years producing a plan that has been in regulatory review for the past six years. The experts have had sufficient time to analyze the plan. Now it is time to move it forward. I highly encourage the U.S. Forest Service to permit this project, using the 2021 Modified Mine Plan presented by Perpetua Resources in the SDEIS, as expeditiously as possible.

Thank you for your time,

*Sincerely,*

*Alana M Shoemaker*
