

I am writing to express my full support of Perpetua Resources and the Stibnite Gold Project. The project would finally address legacy mining issues that have been plaguing the site for decades and help secure the minerals we need for America's future. The company has shown its commitment to Valley County and the state of Idaho and I encourage you to adopt the proposed activities outlined in the company's 2021 Modified Mine Plan during the permitting process.

There are many reasons to support Perpetua Resources improved mine plan. However, this lined in the SDEIS stood out to me: "The restoration activities, particularly providing volitional passage in the East Fork SFSR, would result in a major, permanent, regional, and beneficial effect on Chinook salmon, steelhead, bull trout, and westslope cutthroat trout within the vicinity of mine." Reviewing the SDEIS makes me confident Perpetua can make it good on its promise and show all of us how mining and the environment can work hand in hand.

I encourage the U.S. Forest Service to move the Stibnite Gold Project forward. The permitting process is designed to advance the best plans possible. I believe the work of regulators over the past six years is proof this is what is happening with the Stibnite Gold Project. The thorough review process has been beneficial but there should be no more delays. The project should move forward in a timely manner.
