

I am proud to submit my comments in support of Perpetua Resources' Stibnite Gold Project. This project presents our state with an incredible opportunity to bring well-paying jobs to rural Idaho, boost our state's economy and provide our nation with the much-needed critical mineral antimony. Today, America relies on China and Russia to provide us with antimony. The Stibnite Gold Project could help us secure a domestic source of antimony.

The EIS document estimates that the project will generate \$29.4 million in taxes annually and create thousands of jobs for Idahoans and nationwide. I reviewed section 21 which summarizes the beneficial economic impacts from the project. The 2,690 jobs created by the mine during operations annually, and almost 5,000 jobs created during construction, would be a huge benefit to the local and state economies. Moreover, these would be high paying jobs offering good benefits and supporting workers families. This is exactly the kind of economic incentive that is needed in rural Idaho. The McCall area can't make it on tourism alone.

The SDEIS reduces the size of the project footprint, improves water quality, eliminates the need for long-term water treatment and makes sure water temperature on site does not exceed baseline conditions – all while providing our nation with access to a mineral we desperately need. The permitting process has been thorough and complete. Now, I hope the U.S. Forest Service will realize the benefits this project and permit the Stibnite Gold Project using the 2021 Modified Mine Plan.
