

This letter is to express my support of Perpetua's Stibnite Gold Project. America needs this project to be permitted. It would produce our country's only source of antimony, a mineral we need for a secure and sustainable future. I hope after reading my thoughts you will understand why my support for this project is so strong.

The SDEIS concludes there will be net benefits associated with the Stibnite Gold Project. Some of those benefits will occur before mining even starts. For example, Perpetua Resources will construct a fishway that allows fish to travel to upstream habitat that they have been unable to reach for decades. Because of this the SDEIS said the greatest benefit to Chinook salmon and steelhead passage will occur during construction, when the fishway is built. Perpetua eventually plans to restore the East Fork of the South Fork of the Salmon River, so access to upstream waters is permanently restored for fish. I want to see the conditions at Stibnite improve. I know Perpetua Resources can make it happen.

The Stibnite project is a fantastic example of mining for closure to expedite the cleanup of previous mining impacts. I have worked for Perpetua and have been very impressed with direction of the company.

This Stibnite Gold Project is a huge opportunity for Idaho. Please permit the 2021 Modified Mine Plan and move the project forward so America can reap the positive impacts.
