

I am a Washington, resident, but I have a special place in my heart for Idaho, where I play, recreate, and work. I also have been familiar with this project for a long time as a scientist. It is great to see how Perpetua has approached this project and they are a prime example of how to extract resources the right way, while also providing the additional support needed to clean up a wilderness area that is in dire need of it. I support this project, I believe it is the right thing to do for the environment, and for the people that need and use those resources (everyone) while supporting a local Idaho and American economy. I hope you will take the time to consider my comments on why you should move to permit the project.

The permitting process is designed to move the best plans forward and I feel that is what we will do with the 2021 Modified Mine Plan.
