

I have reviewed Perpetua Resources' plans and met with members of their team to better understand the Stibnite Gold Project. I am impressed with the company's commitment to use modern mining to leave the area better than they found it, while providing our nation with the minerals we need. Below are my comments on the plan to be included in the project record.

Idaho is known for its outdoor recreation opportunities, so I understand people's concerns over how the Stibnite Gold Project would impact local tourism. However, the USFS' previous analysis concluded the project would have negligible socioeconomic impacts to the region's recreation tourism sector. So, I feel comfortable supporting the project and the other economic benefits it would bring to our region, including 500+ well-paying jobs, a boon to the state's tax-base and millions more dollars circulating in our local economy. This is our best chance to restore the abandoned Stibnite Mining District, improve regional water quality and secure an American source of antimony. I hope we take advantage of the opportunities the Stibnite Gold Project presents.

Please move the Stibnite Gold Project forward, especially now that the public has had multiple opportunities to provide feedback and regulators have been analyzing Perpetua Resources' plans for six years. The review process has improved the project and now it is time to make it a reality.
