

Perpetua Resources' Stibnite Gold Project presents Idaho, particularly rural Idaho, with a huge economic and environmental opportunity. The company has a plan to improve water quality, wetlands and the river and leave the site better than it is today. I am writing to encourage you to permit the project as quickly as possible.

Perpetua Resources made a lot of improvements to its plan after the last comment period. The community's feedback made the Stibnite Gold Project better. In fact, regulators identified Perpetua's plan as their preferred alternative in the SDEIS. This is a big deal and signals that regulators believe Perpetua can safely mine the site and limit its impact on the environment and surrounding communities. We need the minerals from this project. Now that Perpetua has eliminated the need for long-term water treatment, improved water temperatures on site and reduced the size of the project, the Stibnite Gold Project should move forward.

Thank you for reviewing my comments. Again, after the USFS has lead a rigorous review process, I urge you to permit Perpetua Resources' carefully thought out plan as outlined under the 2021 Modified Mine Plan.

Roger Martin
