

Idaho needs responsible mining.

I am writing in support of the Stibnite Gold Project. The project will help restore the site, secure the minerals we need for our national security and strengthen America's supply chains. Thank you for the opportunity to provide my feedback as part of the National Environmental Policy Act.

Perpetua Resources made a lot of improvements to its plan after the last comment period. The community's feedback made the Stibnite Gold Project better. In fact, regulators identified Perpetua's plan as their preferred alternative in the SDEIS. This is a big deal and signals that regulators believe Perpetua can safely mine the site and limit its impact on the environment and surrounding communities. We need the minerals from this project. Now that Perpetua has eliminated the need for long-term water treatment, improved water temperatures on site and reduced the size of the project, the Stibnite Gold Project should move forward.

I urge you to approve Perpetua Resources' project. The Stibnite Gold Project will provide a huge benefit to our community and the local environment and the company has taken the time to reduce its footprint and improve water quality at site. The permitting process is designed to move the best plans forward and I feel that is what we will do with the 2021 Modified Mine Plan.
