

It is with great pleasure that I write to the U.S. Forest Service to encourage you to permit the proposed activities outlined by Perpetua Resources during this public input process. This project could help restore Stibnite, secure an American source of antimony and strengthen our nation's supply chains.

A diverse economy is a strong economy. I am excited about the year-round employment opportunities and other benefits the Stibnite Gold Project will bring to the region. The economic impacts of the project have been closely analyzed by the USFS and numerous other independent, third-party analysts. I know some are concerned about the project's impacts to tourism. However, analysis by the USFS in the DEIS importantly concluded that the Stibnite Gold Project would have negligible socioeconomic impacts to the region's recreation tourism sector. I hope the Stibnite Gold Project will be allowed to move forward utilizing Burntlog Road, so we can provide more than 500 family-wage jobs to Idahoans and inject millions into the local economy.

Perpetua Resources wants to restore the rivers, wildlife and habitat near the Stibnite Gold Project site. We should let them, especially considering the permitting process has worked and helped the company identify how to improve water quality and temperature in the SDEIS. Please permit the Stibnite Gold Project and continue to move this important project forward.
