

Thank you for the opportunity to comment on the SDEIS for the Stibnite Gold Project. This project is important for Idaho's future and our nation's future. Perpetua Resources has a plan to leave the site better than they found it and produce antimony, a mineral we need for our national defense and clean energy future.

It is clear to me that Perpetua's refined plan, identified as the preferred alternative in the SDEIS, is the safest option for Idahoans. In this plan, Perpetua will utilize the Burntlog Route and not travel along Johnson Creek. This will help reduce the impacts of mine traffic on roads used by recreationalists. Burntlog is also a much safer option. In fact, the SDEIS says there are more avalanches and rockfalls along the Johnson Creek Route and these incidents are more significant in size. It would be unwise to route mine traffic on a road with so many known risks and would likely increase the possibility of accidents. Therefore, I support the preferred alternative using Burntlog Road.

I urge you to approve Perpetua Resources' project. The Stibnite Gold Project will provide a huge benefit to our community and the local environment and the company has taken the time to reduce its footprint and improve water quality at site. The permitting process is designed to move the best plans forward and I feel that is what we will do with the 2021 Modified Mine Plan.
