

Thank you for the opportunity to provide feedback on the Stibnite Gold Project as part of the National Environmental Policy Act. I believe the project can help stop America's import reliance on antimony and address legacy impacts in the historic Stibnite Mining District. I hope my letter will help as you evaluate the recently published SDEIS.

A diverse economy is a strong economy. I am excited about the year-round employment opportunities and other benefits the Stibnite Gold Project will bring to the region. The economic impacts of the project have been closely analyzed by the USFS and numerous other independent, third-party analysts. I know some are concerned about the project's impacts to tourism. However, analysis by the USFS in the DEIS importantly concluded that the Stibnite Gold Project would have negligible socioeconomic impacts to the region's recreation tourism sector. I hope the Stibnite Gold Project will be allowed to move forward utilizing Burntlog Road, so we can provide more than 500 family-wage jobs to Idahoans and inject millions into the local economy.

Reviewing Perpetua Resources' improved plans it is clear to me the company really believes in taking care of the environment and keeping the community safe. That is why they reduced water temperatures, improved water quality and shrunk the project footprint by 13 percent. I urge you to trust in your own review process and permit the Stibnite Gold Project.
