

I am proud to welcome Perpetua Resources into our state and proud to support the Stibnite Gold Project. The project will produce America's only source of antimony, a mineral our national security and clean energy future depends upon, and leave the site in better condition than it is today. I hope you will take the time to consider my comments on why you should move to permit the project.

A diverse economy is a strong economy. I am excited about the year-round employment opportunities and other benefits the Stibnite Gold Project will bring to the region. The economic impacts of the project have been closely analyzed by the USFS and numerous other independent, third-party analysts. I know some are concerned about the project's impacts to tourism. However, analysis by the USFS in the DEIS importantly concluded that the Stibnite Gold Project would have negligible socioeconomic impacts to the region's recreation tourism sector. I hope the Stibnite Gold Project will be allowed to move forward utilizing Burntlog Road, so we can provide more than 500 family-wage jobs to Idahoans and inject millions into the local economy.

As the U.S. Forest Service and other state and federal agencies review the 2021 Modified Mine Plan and determine the course of action, I encourage you to consider the positive benefits Perpetua Resources will have on Idaho, especially now that the company has reduced its environmental footprint and made further improvements to water quality. This truly is a win-win opportunity for Idahoans and the environment. After years of careful scrutiny by regulators and the community, it is time for us to make these benefits a reality.

Jim Palmer
